BISMARK APENKWAH

DESIGN ENGINEER | TECHNICAL PRODUCT DESIGNER

Norwich, UK | +44 7555 824637 | hello@bisacom.dev | bisacom.dev
linkedin.com/in/bismarkapenkwah | github.com/Bisacom-prog

PROFESSIONAL PROFILE

Design Engineer with a master's degree in **IT Management** and a rare blend of advanced **UI/UX systems architecture and production-ready front-end execution (React, Next.js, TypeScript)**. Expert at closing the gap between complex design thinking and technical feasibility, specializing in production-ready Figma component frameworks built 1:1 with frontend tokens. Proven track record of shipping production code for live products, conducting data-informed user research, and optimizing complex SaaS/B2B application workflows to drive measurable business outcomes.

TECHNICAL SKILLS & ECOSYSTEM

- **Design Engineering & Systems:** Reusable UI Component Libraries, Figma Token Architecture, Auto Layout Systems, Responsive Patterns, WCAG 2.2 Accessibility Standards, Multi-state Interactions.
- **Front-End Development:** React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Infrastructure & Tools:** Git, GitHub, Sanity CMS, Vercel, GA4, Figma, FigJam, Adobe Creative Cloud.
- **Product Discovery & Strategy:** Information Architecture, API-Data Mapping, Complex User Flow Simulation, Usability Testing Metrics, Functional Heuristic Audits.

SELECTED SHIPPED PRODUCTS & CASE STUDIES

Ma Adjo's Kitchen — *Shipped Responsive Client Product*

Design Engineer

- **Engineered an end-to-end headless commerce platform** for a UK-based food business, replacing an inefficient, phone-only flow with a structured digital menu and automated WhatsApp ordering.
- **Architected and coded reusable responsive components** matching a unified design system, ensuring pixel-perfect transition from Figma vectors to production-ready Tailwind components.
- **Integrated a custom-configured Headless CMS (Sanity)** to hand over data control to the client while preserving type-safe rendering on the Next.js front end.

ShiftFlow — *Short-Notice Shift Coverage B2B SaaS Workflow*

Technical Product Designer

- **Translated high-friction workforce manual operations** into a comprehensive B2B enterprise scheduling dashboard addressing multi-layered logic constraints.
- **Designed complex status-driven interaction patterns** tracking shift vacancies, algorithmic staff matching, instant notifications, and live roster synchronization.
- **Constructed complete edge-case architectures** for overlapping schedules, manual manager overrides, and time-sensitive error states to secure technical feasibility before code handoff.

Mobile Mechanic — *End-to-End AI-Assisted Roadside Product*

Product Designer

- **Designed an AI-assisted emergency roadside service platform**, balancing automated location diagnostics with a high-stress, low-cognitive-load user onboarding experience.
- **Built high-fidelity interactive motion prototypes** validating critical fallback edge cases like location service denial, mechanic cancellations, and zero-coverage states.

AddoBees CQC Compliance Platform — *Product Design Consultancy*

Technical Consultant

- **Audited Phase 1 of an enterprise B2B compliance software system**, pointing out structural user flow weaknesses, permission tier conflicts, and offline data sync risks.
- **Produced a programmatic Phase 2 architecture roadmap** optimizing AI-assisted reporting layouts, improving handoff speed and implementation readiness for the development squad.

RELEVANT PROFESSIONAL EXPERIENCE

Design Engineer & Front-End Developer | *Bisacom* *2020 – Present*

- **Direct cross-functional delivery** (discovery, UX data synthesis, interface architecture, and clean React code deploy) for startups and mid-market small businesses.
- **Author of *"From Beginner to Hired"*** (Available on Amazon), formalizing the seven-step **B.I.S.A.C.O.M Framework** to standardize scalable design-to-code velocity.
- **Deliver production component ecosystems in GitHub**, writing responsive layouts via Tailwind CSS and Next.js to eradicate "design drift" and minimize code deployment loops.

EDUCATION & FORMAL TRAINING

MSc in Information Technology Management | Coventry University, United Kingdom (2021 – 2023)

BSc in Geomatic Engineering | Kwame Nkrumah University of Science and Technology, Ghana

Selected Training: Complete Web & Mobile Designer (UI/UX, Figma) • Complete Web Development Course
